ARCHITECTURAL MILLWORK

The Design Benchmark of Custom Millwork

CASUAL LINES

Simple lines with a touch of elegance, and a balanced design throughout, we combine modern functionality with hints of tradition.

Using soft colour and stain combinations our casual millwork provides the warmth and elegance your home deserves.

CONTEMPORARY FLARE

Inspired by modern architecture and European flair, Aspen welcomes crisp lines and innovative thinking.

Our designs provide sleek and functional cabinetry through the use of exotic woods, veneers, glass, quartz and vibrant colour combinations which bring you contemporary design at its finest.

TRADITIONAL ELEGANCE

Spanning decades, traditional design lines exude timeless elegance that has become the benchmark of interior design. By incorporating solid colours, stains, glazes, antiquing, and distressing, Aspen can re-create a sense of years past while including all the modern comforts we have come to expect.

DESIGN

Providing our clients with distinguished cabinetry suited to their spaces has allowed us to be a front-runner in custom millwork design. Our designers and fabricators all work together to provide pieces that are specifically suited for each and every individual.

It is our goal to continuously provide our clients with a hassle free experience and to consistently improve ourselves so that we remain at the top of our industry.
